LA Times Applauds Lieu Legislation to Extend Use of DNA Evidence in Sex Crimes

(SACRAMENTO) - In its editorial, the Los Angeles Times praised Assembly Bill 383, authored by Assemblymember Ted W. Lieu (D-Torrance), to give law enforcement agencies more time to analyze biological evidence collected in sex crimes.

"It's a worthy bill in that it would prevent destruction of potentially useful evidence," states the Los Angeles Times editorial. "By allowing agencies more time to deal with their backlogs, it might permit some prosecutions to go forward that might otherwise be thrown out."

AB 383, which received unanimous support earlier this week in the Assembly Public Safety Committee, will help make sure that rape kits get processed and analyzed by extending the permitted time from two years to five years. The use of DNA in sex crimes is the most conclusive proof of identity giving law enforcement the ability to solve crimes, convict the guilty and exonerate the wrongfully accused.

"Over 12,000 samples are sitting in a lab waiting to be tested across Los Angeles County and the clock is running out," said Assemblymember Lieu. "Law enforcement needs more time to ensure those who commit sex crimes are brought to justice."

California law gives law enforcement agencies only two years to analyze the biological evidence collected in sexual assault cases. In Los Angeles County alone, there are thousands of sexual assault rape kits waiting for DNA processing that could be in jeopardy.

AB 383 will be heard in the Assembly Appropriations Committee later this spring.

Assemblymember Ted W. Lieu is Chair of the California Assembly Rules Committee and represents the 53rd Assembly District, which includes El Segundo, Hermosa Beach, Manhattan Beach, Redondo Beach, Torrance, Lomita, Marina Del Rey, and portions of the City of Los Angeles.
