

COVID-19 Update: Vaccine Distribution, Nursing Home Cases Drop, ApprenticeOhio Milestone

(COLUMBUS, Ohio)—Ohio Governor Mike DeWine and Lt. Governor Jon Husted today provided the following updates on Ohio's response to the COVID-19 pandemic.

VACCINE DISTRIBUTION UPDATE

Governor DeWine announced today that Ohio received a total of 214,525 first doses of vaccine this week. A total of 223,025 first doses are scheduled to arrive in Ohio during the week of February 15.

The federal retail pharmacy program will soon begin allotting doses to Ohio's more than 160

Rite Aid pharmacies. Vaccine distribution will also expand into all 194 Kroger pharmacies.

Those with specific medical conditions that put them at a very high risk of dying from COVID-19 will be eligible for vaccinations next

week.

Ohioans born with the medical conditions outlined below, or those who were diagnosed in early childhood whose conditions continued into adulthood, will qualify to be vaccinated beginning

Public Health Advisory System map. A county-by-county breakdown outlining the presence of COVID-19 in all of Ohio's 88 counties can be found on the Ohio Public Health Advisory System's website.

Advisory System Map

APPRENTICEOHIO MILESTONE

Lt. Governor Husted shared that the ApprenticeOhio program has reached an important milestone. More than 5,000 Ohioans have officially graduated from the ApprenticeOhio program since the start of the DeWine-Husted Administration.

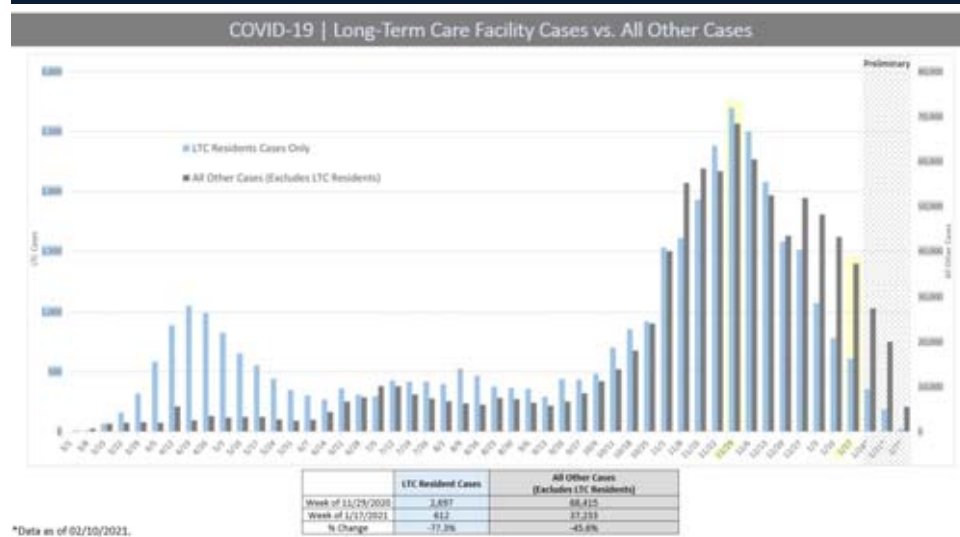

Ohio's Vaccination Program Phase 1B

Ohioans born with or who have early childhood conditions that are carried into adulthood, which put them at higher risk for adverse outcomes due to COVID-19.

The following group of Ohioans are included, even though they are not age 65 and older, because they were born with or developed in childhood a severe condition that puts them at very high risk for dying from COVID-19.

- Sickle cell anemia
- Down syndrome
- Cystic fibrosis
- Muscular dystrophy
- Cerebral palsy
- Spina bifida
- People born with severe heart defects requiring regular specialized medical care.
- People with severe type 1 diabetes, who have been hospitalized for this in the past year.
- Phenylketonuria (PKU), Tay-Sachs and other rare, inherited metabolic disorders.
- Epilepsy with continuing seizures; hydrocephaly; microcephaly; and other severe neurological disorders.
- Turner syndrome, fragile X syndrome, Prader-Willi syndrome, and other severe genetic disorders.
- People with severe asthma, who have been hospitalized for this in the past year.
- Alpha and beta thalassemia
- Solid organ transplant candidates and recipients.

Phase 1B Conditions

Dr. Bruce Vanderhoff, chief medical officer at Ohio Department of Health, explained these conditions in more detail. His remarks are available on the Ohio Channel's YouTube page.

Approximately 12,000 individuals with these severe medical conditions and developmental disabilities have already been vaccinated, and vaccinations of those in this group will continue.

NURSING HOME CASES

Governor DeWine announced today that the number of COVID-19 cases in Ohio's nursing homes has dropped more than 77 percent since late November. This dramatic drop in cases follows Ohio's aggressive efforts to vaccinate residents and staff in Ohio's long-term care facilities.

As outlined in the chart below, there were 2,697 COVID-19 cases in long-term care facilities in Ohio during the week of November 29, 2021. During the week of January 17, there were 612 positive cases.

Nursing Home Case Map

SCHOOL MODEL UPDATE

Governor DeWine shared the latest information on the number of school districts that are physically in school versus those that are fully or partially remote. As a condition to receive priority access to the vaccine, schools were required to commit to full or partial in-person learning by March 1. All but one school district in Ohio have committed to this plan.

School Update

OHIO PUBLIC HEALTH ADVISORY SYSTEM

There was no change in this week's Ohio

Ohio is currently

ranked number one among states who run registered apprenticeships at the state level, and number four among states who run registered apprenticeships at the federal level. Many ApprenticeOhio programs are completed within two to four years. ApprenticeOhio programs provide full-time work during the training period as well as competitive wages - allowing Ohioans to earn while they learn.

On average, apprentices in Ohio earn \$60,000 a year without racking up student loan debt. Ohio offers apprenticeship opportunities in traditional fields like construction and manufacturing, and non-traditional apprenticeship fields like IT and healthcare. Through this program, ApprenticeOhio program sponsors can grow their workforce, improve productivity, reduce turnover costs and increase employee retention.

More information can be found at ApprenticeOhio.gov.

CURRENT CASE DATA

In total, there are 931,437 confirmed and probable cases of COVID-19 reported in Ohio and 12,577 confirmed and probable COVID-19 deaths. A total of 48,269 people have been hospitalized throughout the pandemic, including 6,908 admissions to intensive care units. In-depth data can be accessed by visiting coronavirus.ohio.gov.

Video of today's full update, including versions with foreign language translation, can be viewed on the Ohio Channel's YouTube page.
