PROPOSED "WIRELESS" USA PATENTED SOLUTION TO WORLD ENERGY PROBLEM

Prepared by Donald Lesiak, Monday, December 10, 2007

Did you ever hear of Nicola Tesla a Croatian-Serbian immigrant to the USA who first arrived in New York City on June 6, 1884 and went right to work for Thomas Edison. Keep in mind that Edison was a proponent of direct current (dc) electric power and invented the electric light bulb. Tesla was a University educated Electrical Engineer who invented the initial brushless alternating current induction motor in 1882 when in Croatia and was awarded a USA patent

on it in 1887. He then constructed the initial brushless alternating current induction motor which he demonstrated to the American Institute of Electrical Engineers (now IEEE) in 1888. In the same year, he developed the principles of his Tesla Coil and began working with George Westinghouse at the Westinghouse Electric & Manufacturing Co.'s Pittsburg Labs. Westinghouse listened to his ideas for polyphase systems which would allow transmission of alternating current electricity over large distances but over wires. (today's electrical grids which are expensive and problematic). Tesla sold some of these patents to George Westinghouse and in 1893 they designed and built ac-generators for the Chicago World's Fair and the World saw light for the first time on a gigantic scale using ac-power. In 1895 they installed ac-generators at Niagara Falls . PA and then extended power lines to Buffalo and now we have ac-electric power worldwide. It is now proposed that the power lines go "wireless" using some of Tesla USA patents issued in the early 1900s. Just think of the worldwide possibili-

Donald Lesiak of Parma, Ohio USA (a Cleveland suburb) as President/CEO of The International Profit And Growth Engineers, LLC (TIP-AGE) states that our mission as "Productivity Consultants" is to "Make the Sun Stand Still" just like the Polish Astronomer Nicolas Copernicus did about 532 years ago when he discovered that the "Planets Rotate About the Sun, Not the Earth" which was then proven by the invention of the telescope by Italian Astronomer Galileo. Another concept not talked about much but is also part of our "Mission Statement" is "Mind Over Matter" (quotation author unknown). Our philosophy is

Chance", "TODAY IS TOMOR-ROW", and Pleasing Your Boss, the CUSTOMER, YOU". I believe that "TOGETHER, WE CAN MAKE THE SUN STAND STILL" with "WIRELESS" electric power worldwide at "commercial power levels". How about laptop computers without batteries!

(1) Paragraph removed noted below

When we assess our current World situation as to where we are now, and NOW define where we want to GO along with HOW we are going to get there gives all of us the capability of helping all of

Mankind on Earth, and maybe even the rest of the Universe. "What's wrong with the Uncommon, Common Good of the People for a Change Worldwide and then throughout the Universe?"

It is for these reasons that I now propose the upgrade of the Cleveland Municipal Power Plant and others worldwide by utilizing "TESLA TECHNOL-OGY" to enable the transmission of electric power at 'commercial power levels" through the air or ground "WITHOUT WIRES" like Tesla did in Colorado Springs, Colorado USA from 1899 to 1900. With 107 years of technology advancement since then, I believe 'We have a sporting chance". This is what then USA NASA Rocket Engineer Dr. Werner Von Braun said to then President John F. Kennedy when he asked Dr. Von Braun about the "Probability of Man going to the Moon and returning safely" and it was accomplished in

(2) Paragraph removed noted below

It is with this kind of vision that I propose that the City of Cleveland's Municipal Electric Power Plant and others around the world be upgraded to a "Tesla Power Plant" and when we begin transmitting electric power through the air or ground at "commercial power levels", we will then be able to transmit electric power to Canada and other parts of the USA, then we can remove the gasoline engines and gas tanks from automobiles, trucks and other vehicles and replace them with electric motors in each wheel and also eliminate the transmission. This is what I and others have called "possibility thinking" (author unknown) and disruptive technology.

The automobile manufacturing companies worldwide today are probably pushing hard to make their

"Profit and Growth by Plan, not by cars all electric in anticipation of the arrival of Hydrogen Fuel Cells, but the questions that remain are how much will it cost and how soon will it happen considering the needed infrastructure? I believe using the Tesla concepts of transmitting electric power through air or ground to an "ANTENNA AND POWER RECEIVER" in many kinds of vehicles is simpler and would provide a greater return on investment (ROI) for all of us. Again, "What's Wrong with the Uncommon, Common Good of the People for a Change, Worldwide?" Let the automobile companies and others continue to go all electric in their products because when they get done we will replace their Hydrogen infrastructure and Fuel Cells with a grossly more efficient system that Nicola Tesla envisioned over 107 years ago. Again, together this is "Mind Over Matter"

> Now, when this happens, OPEC and other Countries with oil will not have to ship oil around the World. All they will have to do is build TESLA ELECTRICAL TRANSMITTING TOWERS in their oil fields and transmit electric power through the air or ground at "commercial power levels" and away they go laughing all the way to the bank. You could also do this wherever "Natural Gas" or "Coal" fields are located in place of shipping "Liquid Natural Gas" and coal around the World. I have identified technology to convert coal to utilize "Tesla wireless power".

(author unknown).

In conclusion, "Opportunities never come to those who wait, but are captured by those who dare to go ahead" (author unknown).

Donald R. Lesiak is a Professional Engineer, a 2007

Certified Manufacturing Engineer - Robotics, and a Certified Government Financial Manager and can be reached at in USA at 440-845-4129 or E-Mail: tip-age@ix.netcom.com

(1) Paragraph Removed from above

It seems to me that for years, many of those who are passionate about Nicola Tesla, if they even know about him since he has been removed from USA history. speak only about his great accomplishments that occurred in the past during his lifetime . We know his great inventions were way ahead of his time and have actually helped us to get to where we are today economically and technologically in many of our Countries of the World. However, TODAY, this is not enough and TODAY we must prepare the "Youth of Today" and the "Future Generations of Tomorrow" by "MAKING HISTORY NOW" and in the future, and not just by talking about the past. We must do this by doing something constructive NOW, and which we should define and schedule to make it all happen SOON, and of course fund it!

(2) Paragraph Removed from above

Having worked as a Consulting Engineer at RCA in Burlington, Massachusetts USA on the NASA Apollo Moon Shot Program, we got built to NASA White Room Specifications the 1st Digital Black Box that throttled the final Descent Engine successfully (automatically or manually as was required). It was officially called the Apollo Descent Engine Control Assembly (DECA).

Prepared by Donald Lesiak, Monday, December 10,

The Honorable Zhou Wenzhong

Ambassador Extraordinary and Plenipotentiary of the People's Republic of China to the US

Breakfast Business Seminar

Friday, January 18, 2008 8:00 - 11:00 am

Ambassador Zhou, representatives of the Embassy of China and the Consulate-General of China, and of US companies will participate in two panel discussions at the CCWA Breakfast Business Semi-

Panel Discussion Topic #1: Assuring Product Safety in the Chinese Supply Chain: Lessons Learned

Panel Discussion Topic #2: Corporate Social Responsibility: A Path to Commercial Opportunity in China

Ambassador Zhou will also speak at the City Club of Cleveland on Friday, January 18, 2008. The lunchtime event is presented in partnership with the City Club.

Last issue us listed City Club and World Trade Center Cleveland as the sponsor. The information listed was not correct. World Trade Center Cleveland is not involved.

Career Opportunities

The excitement of change and the promise of growth. That's what you'll find in today's deregulated energy industry and in a career with Dominion.

Gas Controller I

Requisition Number: 8341BR

Location: Cleveland, OH

Job Summary:

You will ensure distribution and/or transmission gas volumes and pressures meet customer and operational demands; maintain detailed and accurate records of daily gas control operations.

- 1. Maintain accurate records of gas control operations; record and calculate pressures.
- 2. Ensure gas volume and pressures meet market requirements; coordinate with suppliers and forecast and adjust flow pressures and quantities.
- 3. Monitor and maintain the SCADA System.
- 4. Ensure pipeline pressures stay within Maximum Allowable Operating Pressures (MAOP.)
- 5. Analyze the transmission system and recommend or perform changes or modifications to ensure a safe and reliable system; communicate pertinent information and assist regional personnel during normal, abnormal and emergency situations.
- 6. Direct gas flows and adjust pressures during repairs, outages and emergencies.
- 7. Provide assistance and instruction to field personnel in the operation of transmission, production, storage and distribution facilities; dispatch field personnel as required.
- 8. Analyze gas control data and respond to SCADA alarms; determine and implement appropriate corrective actions
- 9. Monitor, control, and document the transportation of natural gas from supply to end user.
- 10. Notify interruptible customers as required.
- 11. Coordinate requests for natural gas flow and operating information.

Knowledge, Skills, and Abilities:

- *Knowledge of gas transmission or gas distribution pipeline system operations and pipeline network and facilities (e.g., compressor stations, storage pools, production systems, etc.)
- * Knowledge of gas transmission or gas distribution company operating procedures, policies and applicable regulations are preferred.

Education, Certification and Other Qualifications:

Associates in Engineering Technology

Working Conditions:

- ★76% 100% Office Work Environment
- *Up To 25% Travel
- *Requires rotating shift work, 76% 100%
- * May be required to work weekends and /or holidays.

Dominion is one of the nation's largest producers of energy, with a portfolio of more than 26,500 megawatts of generation and 7,800 miles of natural gas transmission pipeline. Dominion also owns and operates the nation's largest underground natural gas storage system with about 960 billion cubic feet of storage capacity and serves retail energy customers in 11 states. You can experience the excitement of our company—it's the difference between taking a job and starting a career.

Dominion is an equal opportunity employer and is committed to a diverse workforce.

It all starts here, with you.

Please view our career opportunities at Dominion by visiting www.dom.com/jobs/index.jsp All applicants must apply on-line.

我們創造性的課程將爲您的孩子打好基础 使其今後能够成爲一名有自信心和好學的學 生。每一天您的孩子都會在我們專門設計的環 境中通過實踐和探索,學習和健康成長
